SUPPLEMENT TO
REPORT NO.

There are a total of approximately ten batteries of 12-inch and nine-inch guns and approximately 15 batteries of eight inch and six inch guns on the islands of Aegna (59-35N, 24-47E), Naissaar (59-34N, 24-31E), Prangli (59-37N, 25-00E), Pedassaar (59-31N, 25-22E), and on the peninsulas of Viimsi (59-30N, 24-50E) and Suurupi (59-27N, 24-24E). These guns are all of a long-range naval type. In addition there are also well-camouflaged anti-aircraft emplacements, radar stations, and torpedo tubes. The heavy artillery pieces are reportedly mounted close to the ground on revolving mounts; the fire-control chambers and ammunition storage areas are underground.
